PARTNERSHIP

Böln llega a Chile de la mano de Dunati

Somos el distribuidor oficial de Böln en Chile. Traemos sus colecciones a los espacios de trabajo del país con la misma convicción que guía todo lo que hacemos: humanizar los lugares donde pasamos el día y entender el bienestar como estándar.

Böln diseña y fabrica en España mobiliario para espacios colectivos con Flexyskin®, una tecnología propia de espuma de poliuretano de origen vegetal. Superficies suaves al tacto y a la vez firmes, resistentes, impermeables e ignífugas, con una paleta de color capaz de cambiarle el carácter a un lugar.

Nuestro trabajo empieza antes de la compra y sigue después de la entrega: asesoramos en la elección, planificamos la distribución del mobiliario en el espacio, coordinamos importación y plazos, entregamos e instalamos. Y respondemos acá, en tu horario.

Dunati is Böln's official partner in Chile. We bring these collections to workplaces across the country, along with local advice, space planning, delivery and installation. Böln designs and manufactures in Spain using Flexyskin®, its own plant-based polyurethane foam technology: surfaces that are soft to the touch yet firm, durable, waterproof and fireproof.

Bōln

More flexible, more eco-friendly,
more innovative and, above all,
softer and more pleasant.
These are the environments and
world to which we aspire.

*Más flexibles, más ecológicos, más innovadores y,
sobre todo, más suaves y agradables. Así son los
entornos y el mundo al que aspiramos.*

We believe that a better future is possible.

A more respectful and mindful world; designed from a human and creative perspective; with an industry that is playing its part, taking responsibility and committed to being part of the change.

At Bôln we are not dreamers, we are an active part of the movement to make things better. This is why we have developed a technology that uses plant-based materials, which we use to foster the design of furniture and equipment that is able to provide contract spaces with expressiveness, emotion, wellbeing and comfort.

Creemos que un futuro mejor es posible.

Un mundo más respetuoso y consciente; diseñado bajo una perspectiva humana y creativa; con una industria involucrada, responsable y comprometida en ser parte del cambio.

En Bôln no somos soñadores, somos parte activa del movimiento hacia la reparación. Por eso, hemos desarrollado una tecnología que emplea un material de origen vegetal, con la que impulsamos el diseño de un mobiliario y un equipamiento capaz de proporcionar expresividad, emoción, bienestar y confort a los espacios contract.

Surfaces that are both firm and soft to the touch; compact and organic. We have developed the technology to make this possible.

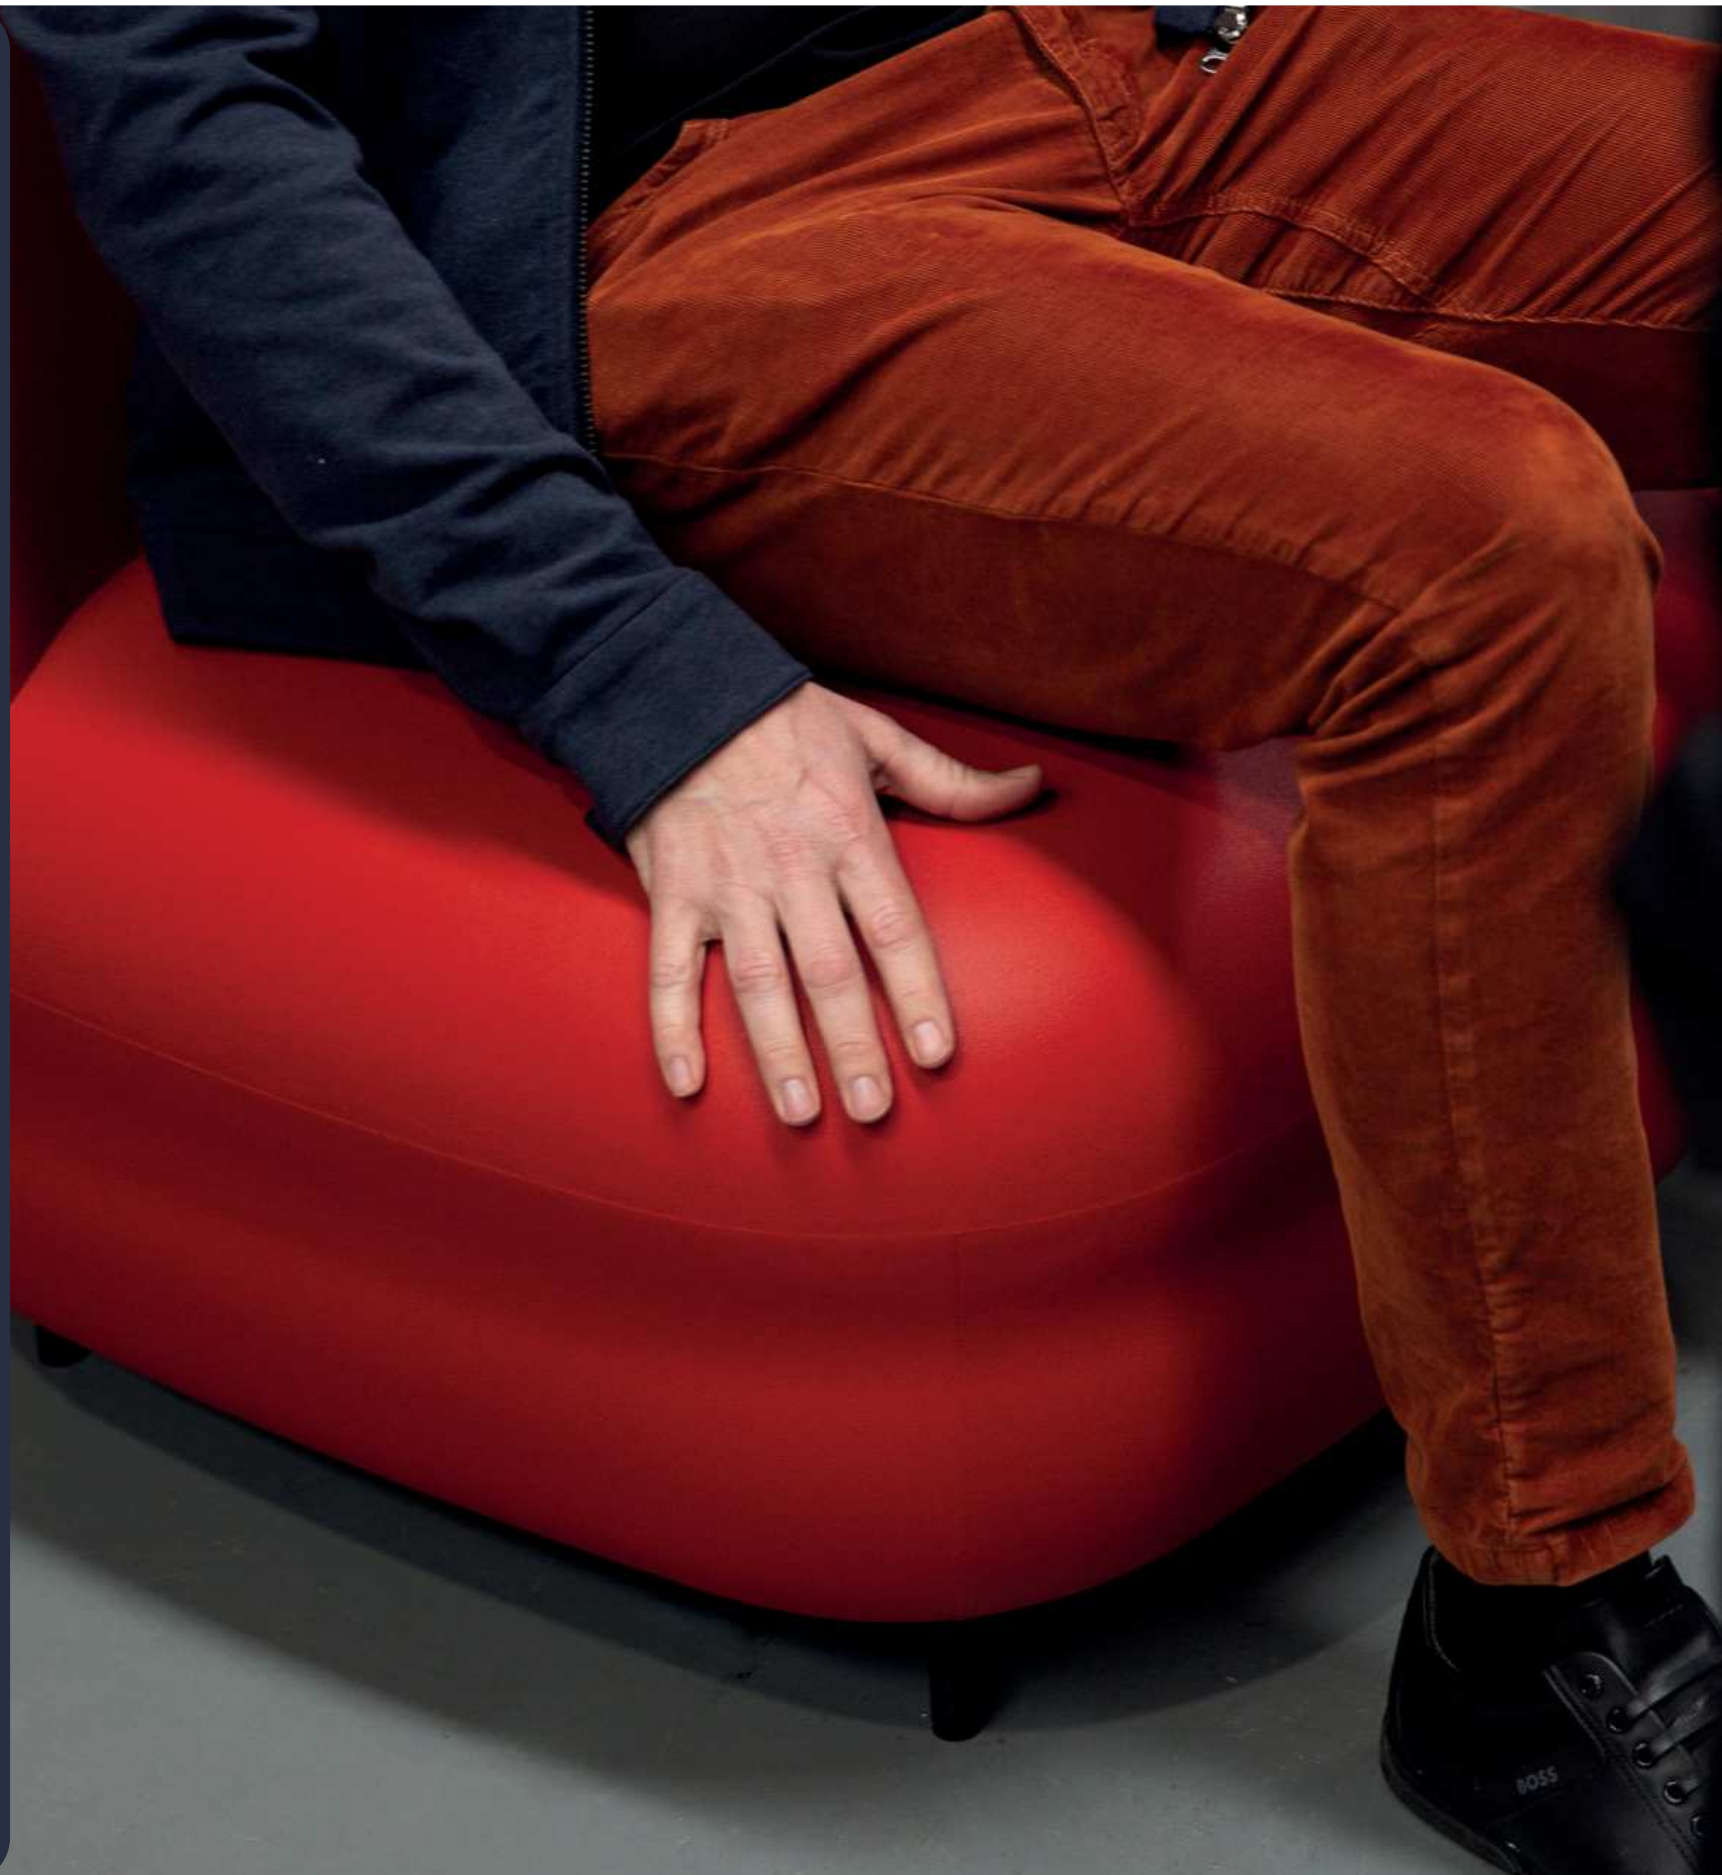

Superficies de tacto firme y blando al mismo tiempo; Compactas y orgánicas. Hemos desarrollado la tecnología que lo hace posible.

Böln's collections are made with Flexyskin®, a proprietary technology that uses an innovative polyurethane foam made from plant waste, which creates fluid and solid volumes, but with a surprisingly soft and plush feel.

Both the material and the manufacturing technology allow us to produce highly durable, sturdy pieces with fireproof and antibacterial properties, which perform exceptionally well both in contract spaces and outdoors, as their surfaces are also waterproof.

Las colecciones de Böln se fabrican con Flexyskin®, una tecnología propia a partir de una novedosa espuma de poliuretano procedente de residuos vegetales, que genera volúmenes fluidos y sólidos, pero con un sorprendente tacto blando y mullido.

Tanto el material como la tecnología de fabricación permiten conseguir piezas de una gran durabilidad y resistencia, con propiedades ignífugas y antibacterianas, así como un excepcional rendimiento tanto en espacios contract como en exteriores ya que, además, sus superficies resultan impermeables al agua.

Böln's collections have been created to inspire design professionals to develop creative and unique contract spaces.

Las colecciones de Böln han sido concebidas para inspirar a los profesionales del diseño a proyectar espacios contract creativos y singulares.

With their organic look, arrangement flexibility, ability to blend into a wide variety of settings and strong color palette, the composition of Böln's designs are extremely versatile.

Sustainability is just as important to us as being able to present collections that spark the ingenuity and creativity of designers and architects, allowing them to find elements in our designs to create innovative and appealing spaces with a distinctive and unique character.

Por su estética orgánica, su flexibilidad de configuración, su capacidad para encajar en múltiples escenarios y su potente gama de color, los diseños de Böln resultan extremadamente versátiles a nivel compositivo.

Nos importa tanto la sostenibilidad como ser capaces de proponer colecciones que estimulen el ingenio y la creatividad de diseñadores y arquitectos, para que encuentren en nuestras propuestas elementos con los que proyectar espacios innovadores y sugerentes a partes iguales, con un carácter distintivo y singular.

BENEFITS

Snapshot

ORGANIC ORIGIN

The raw material used for the Flexyskin® technique comes from plant waste and is certified by REDcert. This material is eco-friendly and recyclable.

FEWER RESOURCES

Flexyskin® technology reduces the amount of material used by up to 70% compared to other similar processes. Power consumption is also lower as the molds allow us to produce it at a low temperature.

SMALL FOOTPRINT

The biomass-based polyurethane foam used in Flexyskin® technology is also a very lightweight material that leaves a smaller carbon footprint.

TESTED

The quality, safety and sustainability of the entire manufacturing process and sourcing of raw materials are certified according to the EN 71-3:2019 and ISO 9001 standards.

BENEFITS

Design

FIRM AND SOFT TEXTURE

This may seem contradictory, but it's not. The robust and compact material used in Böln's designs is in fact and soft and smooth to the touch, to provide a comfortable rest.

SEAMLESS

The compact block produced with Flexyskin® technology provides a fluid, organic design for Böln's attractive and unique collections.

VERSATILE

For neutral, colorful, static or reconfigurable spaces... the Böln collections have been designed to blend smoothly into a wide range of settings and styles. From communal residential areas, hotels and shopping malls to offices, airports, sports centers, stores, waiting rooms and hospitality settings.

INFINITE SETTINGS

Their design elevates the expressiveness of all types of contract interiors to another level. However, because of their properties, Böln products are also highly effective outdoors, even in harsh weather.

CUSTOMIZABLE

All Böln collections can be made in specific shades for corporate settings on demand. And with their accessories, you can create flexible and functional designs with countless configuration options.

BENEFITS

Performance

FIREPROOF

Flexyskin® material is not flammable and does not spread flames, which is crucial in shared spaces. It has been certified according to the BS 5852:06 CRIB 5, UNE-EN 1021:15 and UNE-EN 1021-2:15 standards.

WATERPROOF

Water will not seep into the surfaces produced using the Flexyskin® technique, which is what makes our products so perfect for outdoor environments, including saline settings. Certified according to the UNE-EN ISO 811 and UNE EN ISO 9227:2023 standards.

STRONG

The Flexyskin® technique makes Böln's designs stronger than other similar products, preventing wear and tear from abrasion in high-traffic areas. Certified according to the UNE-EN ISO 4892-2 standards and achieved the highest rating in the UNE-EN ISO 5470-2:2022 abrasion test.

ANTIBACTERIAL

The surfaces in Böln's collections have antifungal and antibacterial properties certified according to the JIS Z 2801 (ISO 22196) standard.

EASY TO CLEAN

The furniture is waterproof and has an organic design produced by the Flexyskin® technique that makes it easy to clean on a regular basis. Its maintenance process is certified according to the UNE-EN 12720 standard.

IDEAL FOR CHILDREN'S ENVIRONMENTS

The Flexyskin® technique is suitable for use in furniture designed for children's spaces. Certified under the UNE-EN 716-2:2018 standards.

SAREK

SAREK

By Stone Designs

Like painting a landscape. Sarek is a collection of modules and accessories that can be used to create fluid and flexible seating designs and environments.

With just a few modules you can design creative seating formats, whether in a curved, straight or geometric arrangement. There's no reason for you to keep the same arrangement, as it can be easily reconfigured.

The Sarek collection is like a 3D design tool, as it includes a set of accessories such as dividers, plant pots, tables that can be built into the seating or be free-standing, and a wastebasket. This allows you to create all kinds of settings, providing multiple functionalities for communal spaces such as offices, halls or multi-purpose rooms.

VISTAS

VISTAS

By Mattias Stenberg

With their powerful rounded look and vibrant color palette, the seats in the Vistas collection are an unbeatable way to inject energy into a space.

The units are designed to create different seating structures and layouts, both free-standing and stand-alone, as well as in-line or 360°.

Vistas modules can be placed on the floor, mounted on slim legs or placed on a platform.

Additionally, these three options also change its appearance slightly: from casual and easy to rearrange to a more stylish or lasting effect.

ABISKO

ABISKO

By Stone Designs

Organic and colorful, the Abisko collection is like an abstraction of the stunning rounded yet delicate forms of nature.

The stools provide pure contrast, with their bulky seats that, at first glance, appear stiff but are actually soft to the touch, standing on slender, almost intangible metal or wooden legs.

The contrast between the curving roundness of the seat and the lightness of its base, so often found in nature, gives the Abisko collection a unique, sympathetic character with organic forms, ideal for creating both indoor and outdoor spaces that evoke the natural environment, like the National Park in Sweden from which it takes its name.

ABISKO

ABISKO

In an ecosystem where mobility and versatility are key, Abisko Castor shows its full potential.

Benefiting from the best virtues of its comfortable seat, in this version, we equip it with wheels and a side table perfect for taking notes, having a coffee or checking your email on your mobile.

Abisko Castor responds to the need to create versatile, comfortable, and why not, playful and colorful pieces that help us solve informal situations, in which traditional types of furniture do not provide a solution to the current needs in contract spaces.

Is it a seat or is it a toy? The rounded shapes and soft surfaces of Abisko Kids seats are like a magnet for children.

Children not only find them very pleasant to touch but also fun, because of the way they can interact with their sleek and soft forms. This is also precisely why this furniture is totally safe for them.

Abisko Kids seats are designed for settings such as schools, playgrounds and other communal spaces that require a children's area. They weigh very little and can be fitted with a tubular metal backrest and casters, making them especially practical in spaces that need to be rearranged frequently.

SLIM

SLIM

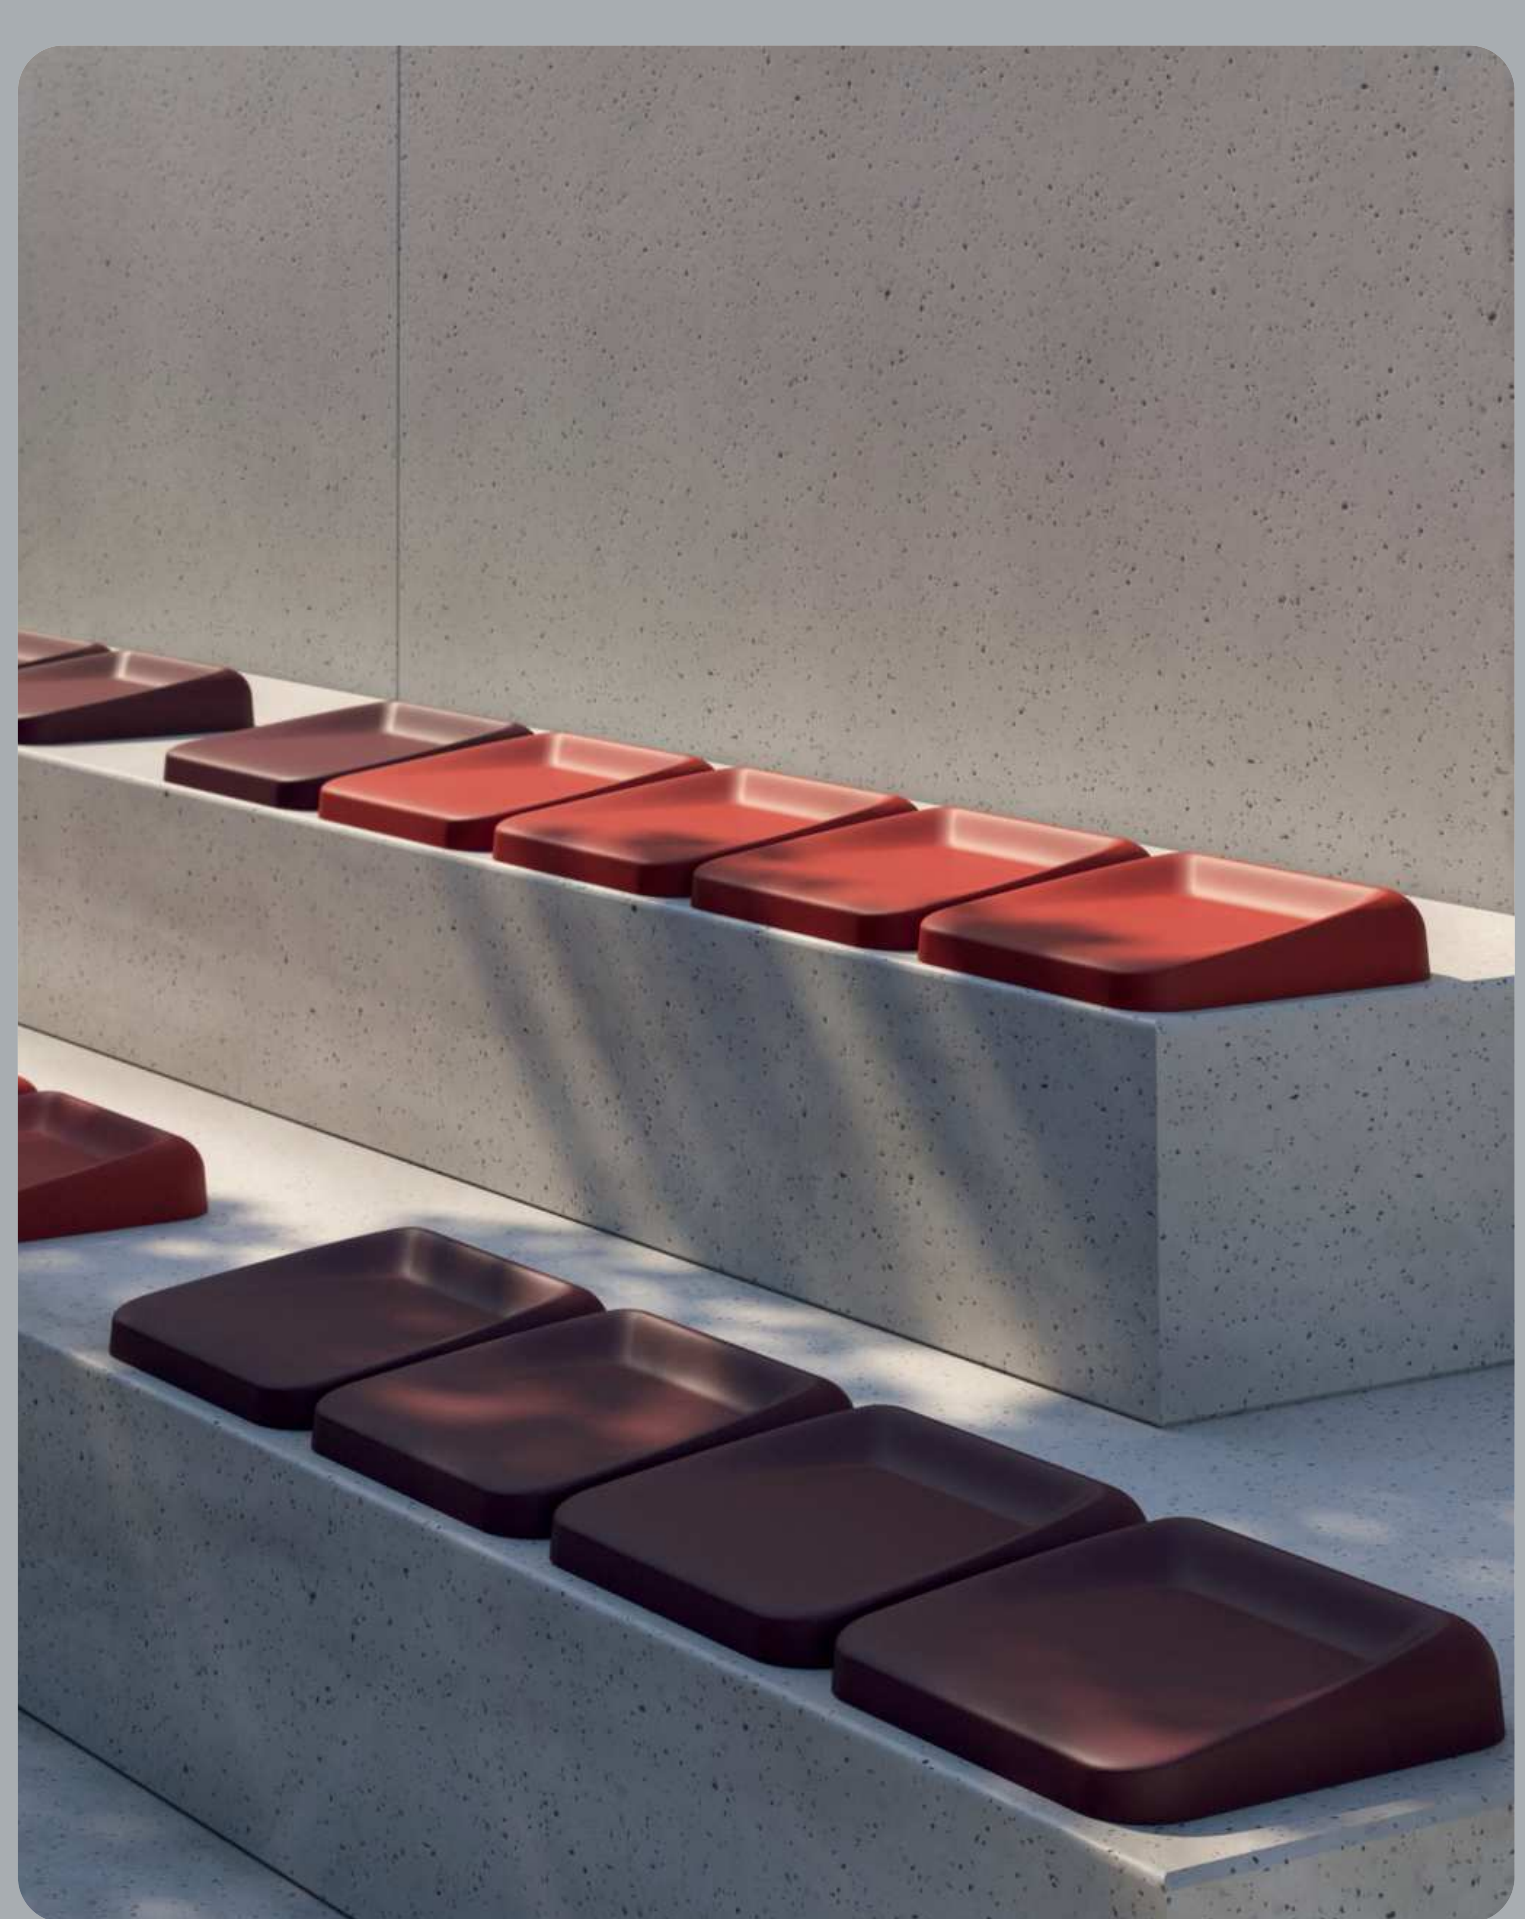

By Stone Designs

Slim is a multi-functional collection of seats with a sleek and very simple, almost schematic, design.

The collection is based around a small Flexyskin® piece that serves as an individual ergonomic seat, like a cushion. Thanks to its versatility and casual design, it can be used directly on the ground or to add comfort to existing bleachers, benches and seats with extremely hard surfaces.

Minimal structure, maximum expression. Individual Slim seats can be attached to the various types of bases in the collection: two two-seater and three-seater in-line benches, a curved bench, a stool and two structures with a table in the middle. With these combinations it is possible to set up multi-purpose public and communal spaces such as waiting rooms, rest areas and makeshift auditoriums.

KUB

KUB

By Nacar Design

Kub is a collection for creating a bleacher effect with a simple modular wooden box-based design.

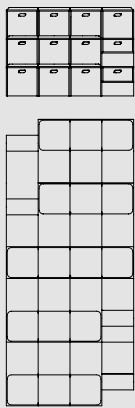

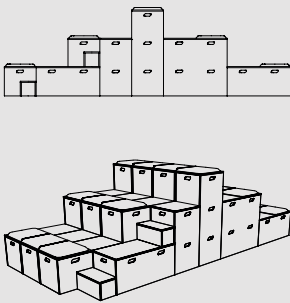

The top part, made of Flexyskin®, serves as an ergonomic seat, resulting in very comfortable, firm yet soft bleachers.

As the Kub bleachers have a modular design, the arrangements can be reconfigured as and when required. This means that they are able to adapt to different types of events and gatherings, both in corporate spaces and offices as well as in cultural centers or museums, and also in HORECA channel environments.

MANUFACTURING

With the support of a consolidated industry

Böln is a furniture brand designed for contract spaces, whose collections have the support of Poliuretanos Rivas to be produced. That is an industrial company dedicated to injected polyurethane foam for over 40 years.

The company's strong history is the best endorsement for Böln given its experience developing industrial equipment for the automotive, hotel and healthcare industries, among others. Also, their company is committed to sustainable, eco-friendly and local development, the reason why they keep all their production in Spain.

NATURAL AND SUSTAINABLE

Böln is a new brand of furniture designed for contract spaces and is supported by Poliuretanos Rivas, an industrial company that has been specializing in injected polyurethane foam for over 40 years.

Böln collections have been designed to withstand heavy use in shared outdoor spaces. They are made with Flexyskin®, our own new revolutionary eco-friendly technique.

Our corporate policy includes a plan to foster development through sustainable practices:

- » The raw material used is certified by REDcert as an eco-friendly material and comes from green waste.
- » To manufacture Böln products, we use up to 70% less material than other similar processes.
- » The energy consumption required for Flexyskin® is less than usual as we use low-temperature molds.
- » Our production process is subject to external audits to comply with the energy efficiency standards.
- » The polyurethane foam used comes from biomass. This is an eco-friendly, recyclable and light material.
- » Böln products barely leave a carbon footprint as we use the least amount of raw materials possible and their scarce weight means a lighter transport too.
- » All our product packaging is made with recycled and recyclable materials.
- » Böln concentrates all its production in Spain and contributes to make a sustainable socio-economic environment, encouraging the development of local suppliers.
- » We believe in using clean, renewable energy and we are developing an ambitious energy self-supply project.

Bōln

El respaldo local que un proyecto necesita

Dunati empezó en 1977 como un pequeño taller de muebles de oficina. Hoy es una empresa de mobiliario corporativo con fabricación propia, distribución y planificación del espacio, presente en Chile y Latinoamérica.

Traer Böln es parte de la misma idea que nos mueve desde el principio: acercar mobiliario que hace que los espacios de trabajo se sientan mejor. Elegimos marcas que diseñan pensando en las personas, y nos hacemos cargo de todo lo que viene después de elegir.

Founded in 1977, Dunati designs, manufactures and supplies furniture for corporate workplaces in Chile and Latin America. As Böln's official partner, we take care of advice, space planning, delivery and installation.

Cuando un espacio está bien diseñado, la vida se ordena distinto: las ideas encuentran su lugar y las personas también.

MANIFIESTO DUNATI

1977	Casi cinco décadas equipando oficinas.
Fabricación propia	Mobiliario de diseño y producción propios, más marcas seleccionadas como Böln.
Chile y LatAm	Dos showrooms en Santiago, entrega e instalación de nuestro propio mobiliario.

- 01

Conversamos el proyecto
Cuántas personas, qué uso, qué plazos. Te mostramos opciones y acabados reales en el showroom, para decidir tocando y no adivinando.
- 02

Planificamos el espacio
Proponemos la distribución del mobiliario, las combinaciones de módulos Böln y los colores para cada zona, con planos y vistas del resultado.
- 03

Entregamos e instalamos
Coordinamos importación, plazos y logística. Entregamos, instalamos y seguimos disponibles después, con repuestos y soporte local.
